Student Details:

Name of the Student		Sampath Naik		
USN		4SO21CS138		
Semester / Section		VIII / C		
Name of the Internal Internship		Dr. Saumya Y M		
Guide				
Area of work		Software Quality Assurance & Dotnet Angular FSE		
Internship	ernship From 06/02/2025			
Period	То	16/05/2025		
Duration		Weeks:15	Days: 105	

Company Details:

Name of the Company	Winman Software (P). Limited	
	Winman Software India LLP	
Address	NH-66, Kottara Chowki	
	Mangaluru - 575013	
Website	https://www.winmansoftware.com/	
Company Head	Mr. M Srinivasa Mugeraya	
Name of the Industry Guide	Mr. Ukshith Suvarna	
Contact No	+91 9448369449	
Email - ID	HR@winmansoftware.com	

Company Details:

Name of the Company	Cognizant Technology Solutions		
	Cognizant Technology Solutions		
	India Pvt. Ltd. SDB 1		
Address	Plot No. H-4, SIPCOT IT Park, Padur Post		
	Siruseri, Chengalpattu District 603103		
	Tamil Nadu, India		
Website	https://www.cognizant.com/us/en		

Company Head	Mr. Ravi Kumar S
Name of the Industry Guide	Mr. Santhosh Babu
Contact No	1-800-208-6999

Mr Ukshith Suvarna & Mr Santhosh Babu

Name of the External Guide

Name & Signature of the Internal Guide

VISION OF THE DEPARTMENT

To be recognized as a centre of excellence in computer and allied areas with quality learning and research environment.

MISSION OF THE DEPARTMENT

- 1. Prepare competent professionals in the field of computer and allied fields enriched with ethical values.
- 2. Contribute to the Socio-economic development of the country by imparting quality education in computer and Information Technology.
- 3. Enhance employability through skill development.

Undergraduate Programme in Computer Science and Engineering (B.E.) PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

I. To impart to students a sound foundation and ability to apply engineering fundamentals, mathematics, science and humanities necessary to formulate, analyze, design and implement engineering problems in the field of computer science.

- II. To develop in students the knowledge of fundamentals of computer science and engineering to work in various related fields such as network, data, web and system engineering.
- III. To develop in students the ability to work as a part of team through effective communication on multidisciplinary projects.
- IV. To train students to have successful careers in computer and information technology industry that meets the needs of society enriched with professional ethics.
- V. To develop in students the ability to pursue higher education and engage in research through continuous learning.

PROGRAMME OUTCOMES (POs)

By the end of the undergraduate programme in CSE, graduates will be able to:

- 1. Engineering Knowledge-Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- 2. Problem Analysis -Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions with consideration for sustainable development
- 3. Design/Development of Solutions-Design creative solutions for complex engineering problems and design/ develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required
- 4. Conduct Investigations of Complex Problems -Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions
- 5. Engineering Tool Usage-Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems
- 6. The Engineer and The World-Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment

- 7. Ethics-Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws
- 8. Individual and Collaborative Team Work-Function effectively as an individual, and as a member or leader in diverse/multidisciplinary teams
- 9. Communication-Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences
- 10. Project Management and Finance-Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments
- 11. Life Long Learning-Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change

PROGRAMME SPECIFIC OUTCOMES (PSOs)

By the end of the undergraduate programme in CSE, graduates will be able to:

- 1. Apply knowledge of Data Structures and Algorithms to develop effective programs.
- 2. Design and develop solutions using principles of Computer Networks, Database concepts, Web Based tools and Software engineering.

INTERNSHIP WORK PLAN

Area of Work	Software Testing & Full Stack Development		
	Java, .Net, Angular		
Internship Topic	Full St ack Development & Software Testing Training		
Objectives of the Internship	Gain practical experience in real-time web and backend development Learn modern development frameworks like React and Spring Improve team collaboration and communication skills		
	 Tax Filing Platform (Winman CA-ERP): Validated income tax and GST modules through manual testing. Rental Property Management System (Cognizant): Participated in initial planning, ER modeling, and data structure setup. Database Query Testing: Collaborated with SQL team to validate and optimize queries used in financial applications. 		
Real Time Applications	 4. Test Automation (Selenium): Automated UI interactions for test modules in QA simulation. 5. <u>ASP.NET</u> Backend Services: Developed backend logic with <u>ASP.NET</u> Core and EF Core for data persistence and API design. 		

	1. Ability to perform manual and automated testing		
	using industry-grade tools.		
Expected Outcomes	 Proficiency in backend development with Spring, .NET Core, and database technologies. 		
	3. Application of software design principles (SOLID) and test-driven development (TDD).		
	Exposure to collaborative environments using Agile and Scrum methodologies.		
	Technical		
	Manual and Functional Testing		
	Java, Core Java, Selenium		
	SQL (Joins, Triggers, Cursors), MySQL		
	ASP.NET Core 8, Entity Framework Core		
	JUnit, Mockito (TDD)		
	Git, GitHub, Maven		
	Visual Studio, Postman		
Skills acquired during	Non-technical		
Internship	Team collaboration		
	☐ Communication in Agile meetings		
	☐ Time and task management		
	☐ Adaptability in shifting project environments		
	Initial difficulty in understanding testing workflows		
	and SQL collaboration processes Had to quickly		
	adapt to new tech stacks during the transition		
	between companies.		
Challenges faced during 2. Time management was challenging during			
Internship	transitions and new topic learning.		

Internship

3. Initially struggled with understanding Entity Framework Core and testing frameworks like JUnit/Mockito.
Internship offered dual exposure to QA and development roles, enriching technical depth. Improved problem-solving skills through realtime project challenges.
3. Gained insight into teamwork and collaboration
in different work settings.
4. Enhanced understanding of industry workflows
and agile practices.

Weekly Work Plan

Week 1:

Date	06/02/2025 - 07/02/2025			
Task Assigned	 Complete onboarding at Winman Software. Get familiar with internal tools like Tickets, Reminder, Task Manager, and Leave App. 			
Task Objective	 Understand company regulations and software workflow. Learn usage of communication and time tracking systems. Build foundational knowledge for QA role. 			
Task Outcome	 Successfully integrated into the company's environment. Understood the structure of daily reporting and communication tools. 			

Brief Description of the Work (with supportive diagrams / data tables / tool descriptions etc.)

- Explored tools like Tickets for issue reporting, Reminder for task tracking, and Task Manager for time logging.
- Learned internal procedures for leave application and basic workflow.

Week 2:

Date	10/02/2025 — 14/02/2025
Task Assigned	 Training in manual testing techniques. Learn pretesting protocols and development copy testing.
Task Objective	 Understand functional and regression testing basics. Learn to use the testing server and execute test cases. 3.
Task Outcome	 Acquired hands-on experience in manual test case execution. Gained basic understanding of pretesting rules and setups.

- Performed manual tests on software modules.
- Ran development copies for verification.
- Accessed testing server and validated behavior of features.

Week 3:

Date	17/02/2025 — 21/02/2025
Task Assigned	1. Continue pretesting and regression testing training.
Task Objective	 Reinforce previous week's learning. Apply test execution processes more independently.
Task Outcome	Built confidence in development copy handling.

Brief Description	n of the Work (with supportive diagrams / data tables / tool descriptions etc.)
• Repeated	I pretesting and test case execution processes.
• Focused of	on ensuring quality before major testing phases

<u>Week</u> 4:

Date	24/02/2025 - 28/02/2025
Task Assigned	1. Participate in final testing procedures.
Task Objective	 Execute detailed test cases. Analyze and document issues for QA reporting
Task Outcome	 Gained exposure to release-ready testing standards. Reported bugs and provided feedback to dev team.

- Documented defects and reported them via Tickets.
- Participated in test result evaluations.

Week 5:

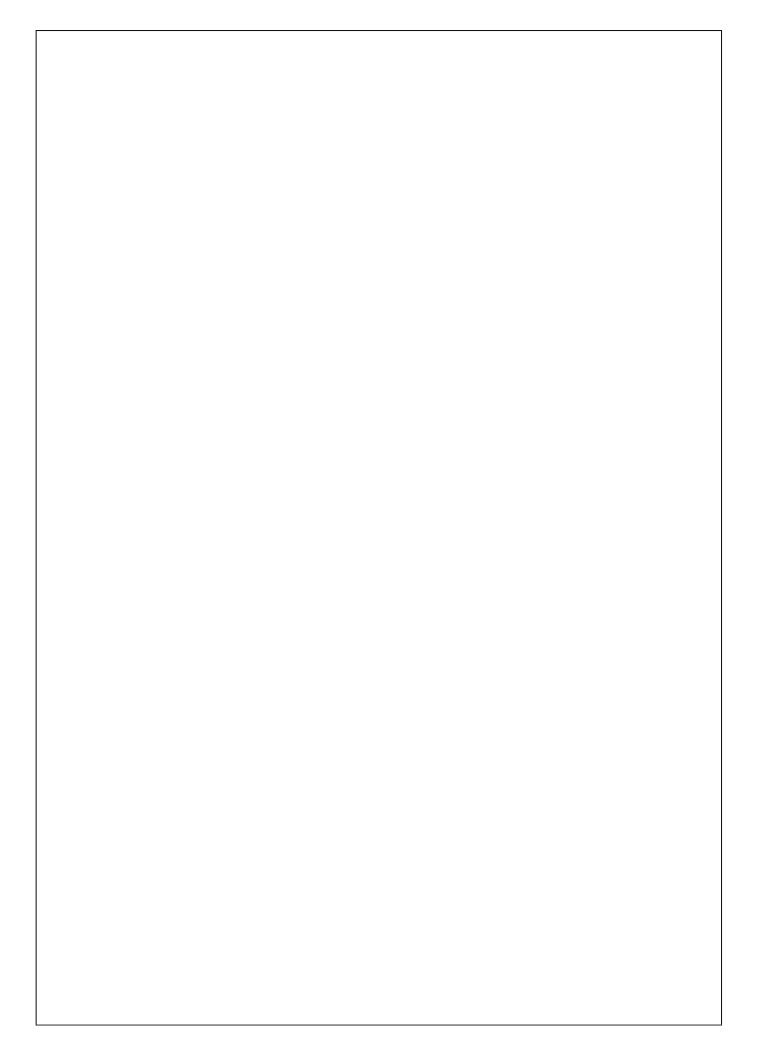

Date	03/03/2025 - 07/03/2025
Task Assigned	1. Continue with final testing execution.
Task Objective	Reinforce testing documentation and analysis skills.
Task Outcome	 Developed accuracy in functional validation. Understood severity classification of bugs.

- Finalized documentation of repeated issues.
- Collaborated closely with supervisors for real-time defect resolution.

<u>Week</u> 6:

Date	10/03/2025 - 14/03/2025
Task Assigned	1. Learn local database setup and SQL collaboration
Task Objective	 Understand how test data interacts with backend databases. Collaborate with the SQL query team.
Task Outcome	 Set up test DB instances locally. Helped create and optimize queries for validation.

- Participated in backend testing involving SQL Server.
- Validated data retrieval and integrity using queries.

Date	17/03/2025 –21/03/2025
Task Assigned	 Study core Java concepts. Begin Selenium training for automation testing.
Task Objective	 Learn basic programming required for automation. Get introduced to automated test frameworks.
Task Outcome	 Understood object-oriented Java fundamentals. Practiced using Selenium to write basic test cases.

- Explored Java syntax, loops, conditionals.
- Ran sample Selenium scripts for browser automation.

Date	24/03/2025 - 28/03/2025
Task Assigned	1. Continue Java and Selenium training
Task Objective	1. Deepen understanding of automated QA techniques.
Task Outcome	 Strengthened command over Java logic. Created functional Selenium test flows.

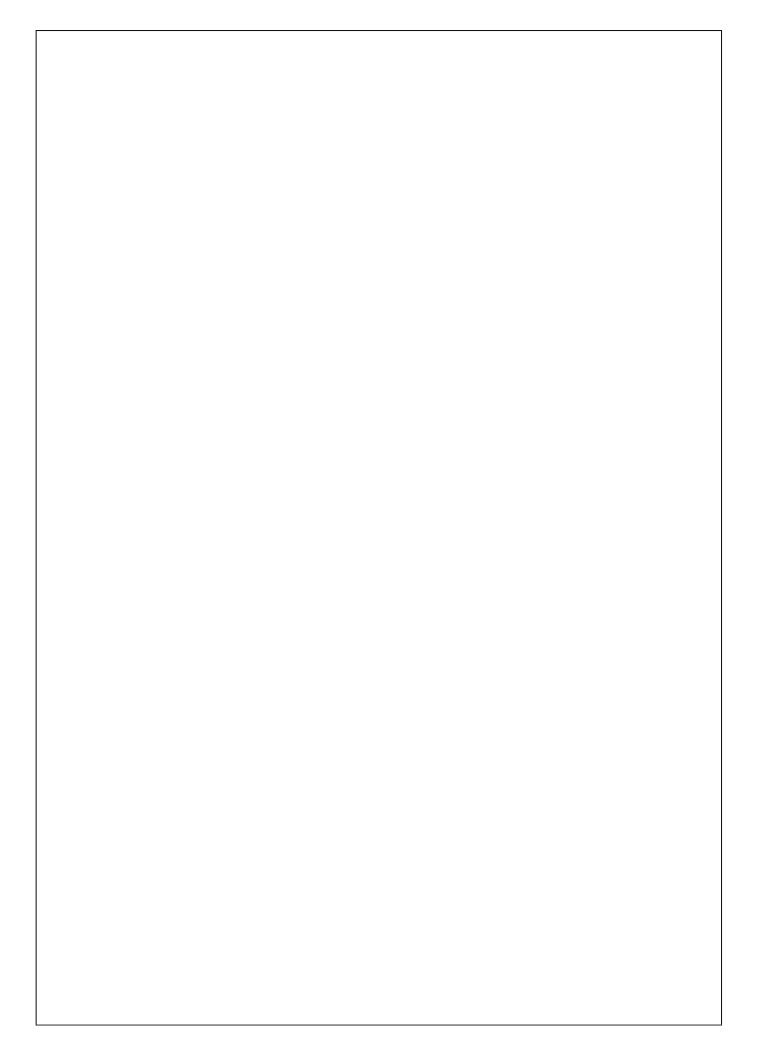

- Developed test cases using Java-Selenium integration.
- Focused on automated UI element interaction.

<u>Week</u> 10<u>:</u>

Week 9:

Date	31/03/2025 - 4/04/2025
Task Assigned	 Onboarding at Cognizant. Get familiar with internal processes and tools.
Task Objective	Understand work environment and expectations.
Task Outcome	 Accessed portals for time, tasks, and communication. Settled into the Full Stack Engineering training phase.

- Understood workflow and tools like Tickets, Leave App.
- Joined induction sessions for project onboarding.

Week 10:

Date	7/04/2025 — 11/04/2025
Task Assigned	Learn SOLID principles and OOP design.
Task Objective	1. Build scalable software components.
Task Outcome	 Applied SOLID principles in practice examples. Developed clean, modular code structure.

Brief Description of the Work (with supportive diagrams / data tables / tool descriptions etc.)

- Worked on inheritance, encapsulation, polymorphism.
- Practiced refactoring using SOLID techniques.

Week 11:

Date	14/04/2025 — 18/04/2025
Task Assigned	1. Learn Entity Framework (EF) concepts.
Task Objective	1. Understand ORM integration in .NET
Task Outcome	 Used EF for data access in .NET Core apps. Managed schema changes via migrations.

- Practiced code-first and DB-first approaches.
- Queried data using LINQ and managed entities.

Week 12:

Date	21/04/2025 - 25/04/2025
Task Assigned	1. Practice advanced SQL queries.
Task Objective	1. Perform data manipulation and analysis.
Task Outcome	 Used joins, subqueries, and aggregates in SQL. Handled real-time data validation tasks.

- Wrote optimized queries for data sets.
- Analyzed test data using SQL Server.

Week 13:

Date	28/04/2025 - 2/05/2025
Task Assigned	1. Explore .NET architecture and C# enhancements.
Task Objective	1. Get comfortable with .NET 8 and C# 12 features.
Task Outcome	 Practiced using new language features. Improved understanding of .NET's evolution.

- Explored microservices and cross-platform deployments.
- Used primary constructors, pattern matching in C#.

Week 14:

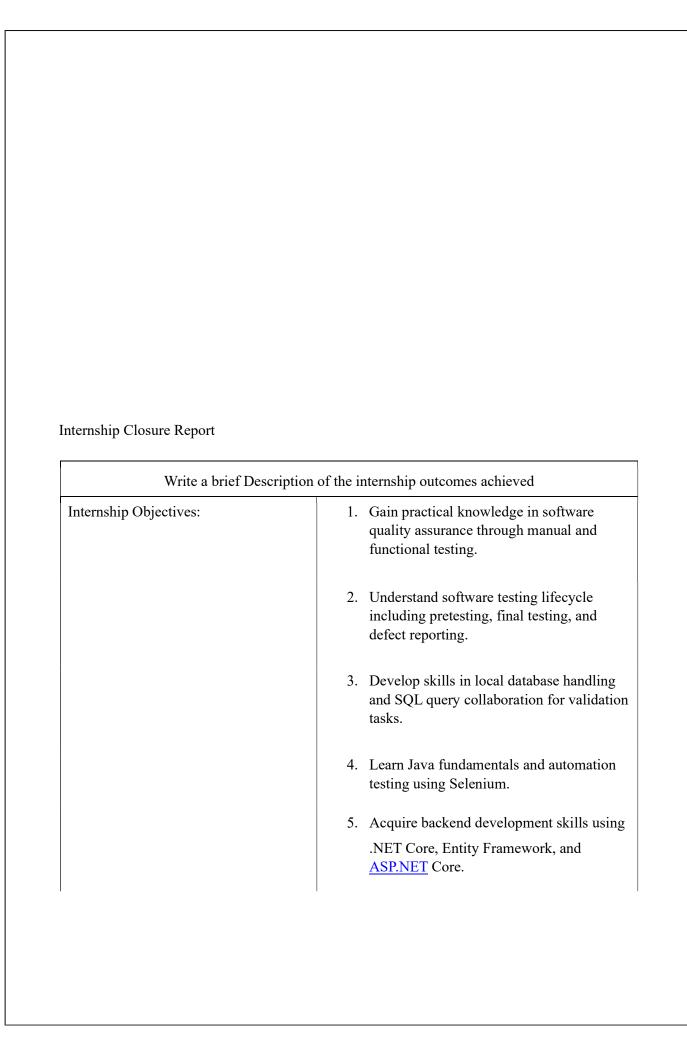

Date	05/05/2025 — 9/05/2025
Task Assigned	 Completed Git course and practiced version control tasks like commit, push, and branching. Integrated GitHub and uploaded sample projects. Take courses on Generative AI tools.
Task Objective	 Brush up Git fundamentals for effective version control. Understand AI tools like ChatGPT and DALL·E. Understand application layering using Entity, Repo, and Controller.
Task Outcome	 Gained confidence in basic Git Commands. Completed Udemy courses on Generative AI. Gained skills in prompt engineering and automation.

- Learned use cases for AI in development.
- Applied prompt design to simulate real-world tasks.

Week 15:

Date	12/05/2025 - 16/05/2025
Task Assigned	Begin project planning for Rental Property System.
Task Objective	1. Identify project requirements and database schema.
Task Outcome	 Designed initial ER diagrams. Mapped out key entities and relationships.

- Identified modules: Properties, Tenants, Payments, Maintenance.
- Created project plan and architecture blueprint.

 Understand and apply object-oriented design principles (SOLID) and Agile methodologies.
7. Explore emerging technologies like Generative AI and improve team collaboration in corporate environments.
Performed manual testing, pretesting, and final testing on tax software modules at Winman Software.
2. Identified and documented software defects and collaborated with development teams for resolution.
3. Gained hands-on experience in database testing using SQL and participated in SQL query optimization.
4. Learned core Java concepts and automated test case development using Selenium.
5. Understood .NET architecture and developed applications using ASP.NET Core and Entity Framework.
6. Applied SOLID principles, Test-Driven Development (TDD), and created unit tests using JUnit and Mockito.
7. Participated in Agile-based team activities, onboarding sessions, ethics training, and explored Generative AI tools.

Objectives could not be Accomplished:	Could not work on client-side development tasks at Cognizant during the internship period.
	 Was unable to complete a full-cycle test automation suite using Selenium due to limited exposure time.
Reasons for non-accomplishment	Cognizant focused mainly on technical training before project assignment.
	2. Shift in organization led to discontinuation of work on the earlier project.
Sills acquired during internship period	1. Technical Skills:
	Manual and Regression Testing
	Java Programming and Core Java
	Concepts
	COI Industria Line Courses Triceses
	 SQL – Including Joins, Cursors, Triggers, Transactions
	 Local Database Management and Validation
	• Entity Framework – Code-First and DB-
	First Approaches
	• ASP.NET Core 8 – MVC Architecture,
	Routing, Forms
	JUnit and Mockito for Unit Testing
	Selenium Basics for Automation
	Git for Version Control
	• Postman for API Testing
	Agile Tools and Project Documentation
	-

	2. Soft Skills: Team collaboration, requirement gathering, feedback incorporation, time management
Challenges faced during internship Period	Adapting quickly to two distinct organizational environments (Winman and Cognizant).
	2. Learning and applying software testing processes without prior QA experience.
	3. Managing transitions from manual testing to full-stack development in a short span.
	4. Understanding and implementing complex backend development frameworks such as ASP.NET Core and EF Core.
	 Balancing learning curves for multiple technologies while meeting ongoing deliverables.
	6. Keeping pace with Agile development processes including sprints, retrospectives, and project planning meetings.

Overall Outcome of Internship Training 1. Gained a dual-experience in both software quality assurance and enterprise-grade

 Built a strong foundation in manual testing practices, SQL collaboration, and backend API development.

fullstack development.

- Acquired proficiency in modern development tools such as <u>ASP.NET</u> Core, EF Core, Git, and JUnit.
- Developed an in-depth understanding of Agile methodologies, collaborative team workflows, and structured software development.
- Explored trending technologies like Generative AI, which broadened technical perspectives.
- Transitioned effectively between companies and project types, enhancing adaptability and resilience.
- Improved communication, problemsolving, and technical implementation skills, ensuring readiness for future software engineering roles.
